## Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. As this fund is invested in a particular country, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund.

## Fund Strategy

The fund's aim is to achieve long-term capital growth by investing in shares of companies with substantial exposure to mainland China. Up to 40% of the net asset value of the fund may be exposed to China A-shares listed on the Shanghai or Shenzhen Stock Exchanges, via Stock Connect. We aim to find the best investment ideas within Chinese equities, irrespective of where the companies are listed. The team has a long-established investment process focusing on bottom up stock selection. We like companies that are trading at a discount to our estimation of fair value. A well-resourced and experienced team undertakes on-the-ground research to gain an informational advantage and an opportunity to achieve favourable returns. Environmental, Social and Governance (ESG) considerations are fully integrated in the investment process.

Past performance does not predict future returns. Data points are as at month end.
