### Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As this fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate.

### Fund Strategy

An active, multi-cap global fund focused on capturing consumer trends driven by changes in standards of living, demographics and connectivity. The investment team employs a three-pillar approach to the investment process: 1) research-driven security selection applied through fundamental analysis, valuation and timeliness; 2) portfolio construction determined by consistent diversification practices and strict sell disciplines; 3) risk management and analysis of external thematic factors integrated at every stage of the investment process.

Past performance does not predict future returns. Data points are as at month end.
