### Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The fund may hold a large amount of Asset Backed Securities (ABS) (complex instruments) as well as other lower quality debt securities which may impact the liquidity of the fund under certain circumstances. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. The fund may invest in distressed securities which carry a significant risk of capital loss. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the fund. As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund. The lack of common standards may result in different approaches to setting and achieving ESG objectives. In addition, the respect of the ESG criteria may cause the Fund to forego certain investment opportunities.

### Fund Strategy

The fund provides diversified, actively managed credit exposure across a range of global multi-asset fixed income markets. The construction process leverages the Invesco Fixed Income global research platform to capitalise on the outperformance rotation that can occur in fixed income markets. It is designed to be a disciplined, research-intensive process which combines top-down and bottom-up analysis. The fund meets Article 8 requirements and promotes environmental, social, and good governance practices.

Past performance does not predict future returns. Data points are as at month end.

\*At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.

Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to: <https://www.invescomanagementcompany.lu/lux-manco/literature>.

### Invesco's Approach to ESG

Invesco has an investment-led ESG approach. We provide a comprehensive range of ESG-focused capabilities that enable clients to express their values through investing. Where appropriate, for certain funds, we also integrate financially material ESG considerations, taking into account critical factors that help us deliver strong outcomes to clients.
