Quarterly fund commentary

The fund is closed for additional investment for new investors. This does not impact redemptions. For more information and updates to this status please go to www.invescomanagementcompany.lu/lux-manco. On 6 July 2018, the fund will be merged into Invesco Asia Opportunities Equity Fund.

China equity markets ended the quarter lower as trade tariffs risk continued between the US and China, economic activity disappointed and the currency weakened against the US dollar. Against this backdrop, the People's Bank of China acted to reduce the amount of cash that banks must hold as reserves to encourage them to increase lending. In India, the macroeconomic backdrop remained under pressure as oil prices moved higher and the currency continued to depreciate while Korea and Taiwan were also weaker. We believe it is time for us to focus on companies with stable high growth business models and, with that in mind, markets such as China and India offer appealing opportunities, in our view. In terms of regional sector performance, healthcare was the best performing sector in Q2 thanks to its defensive nature and higher exposure to domestic markets, while the energy sector also benefited as oil prices rallied. For our investment strategy, we favour companies with sustainable earnings growth in sectors such as information technology, industrials, telecom and utilities.
