Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. As this fund is invested in a particular country, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund.

Fund Strategy

The fund aims to achieve long-term capital growth by investing principally in equity or similar instruments of Indian companies. We believe India is a high growth market with a wealth of investment opportunities and that, by focusing on stock fundamentals, we can identify "Quality Growth" companies with strong business models, industry leadership, competitive advantages, strong management and what we believe to be reasonable valuations. We adhere to a purely bottom-up investment process with a conviction-based approach and a preference for private enterprises. Environmental, Social and Governance (ESG) considerations are fully integrated in the investment process.
