Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. The fund may invest in distressed securities which carry a significant risk of capital loss. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. The fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the fund.

Fund Strategy

The fund aims to generate income and long term capital appreciation from investment in Asia-Pacific equities and debt securities (excluding Japan). Our approach to asset allocation is flexible and, based on a clearly defined investment process and risk overlay, aims to reduce downward risks and volatility (although this is not guaranteed). Within equities, we look for companies with sustainable value and competitive advantages. Within fixed income, we aim to maintain a diversified and high-quality portfolio that helps generate income.

This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication. Views and opinions are based on current market conditions and are subject to change. The Bond yield shown is expressed as a % per annum of the current NAV of the fund. It is an estimate for the next 12 months, assuming that the fund's portfolio remains unchanged and there are no defaults or deferrals of coupon payments or capital repayments. The yield is not guaranteed. Nor does it reflect any charges. Investors may be subject to tax on distributions. The Historic Yield for equities reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. Investors may be subject to tax on their distributions. For information on our funds and the relevant risks, refer to the Key Information Documents/Key Investor Information Documents (local languages) and Prospectus (English, French, German, Spanish, Italian), and the financial reports, available from www.invesco.eu.
