Invesco ASEAN Equity Fund

A (HKD)-Acc Shares

This marketing communication is directed at retail clients in the UK and Professional investors in Jersey and Guernsey. Investors should read the legal documents prior to investing.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund.

Fund Strategy

The fund aims to achieve long-term capital growth by investing primarily in listed equity or equityrelated securities of companies in an ASEAN country or with significant exposure to the ASEAN region. We believe the region to be a high growth market with a wealth of investment opportunities. The team makes use of a bottom-up, selective approach to invest in companies that display sustainable leadership and competitive advantages, while trading at a discount to our view of their fair values. We conduct on-the-ground research to gain an information advantage and an opportunity to achieve favourable returns.

Past performance does not predict future returns. Data points are as at month end.
