This marketing communication is directed at retail clients in the UK and Professional investors in Jersey and Guernsey. Investors should read the legal documents prior to investing.

### Summary of fund objective

The investment objective of the Fund is to seek long term capital appreciation, measured in Yen, through investment primarily in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in Japan and which are listed on any exchanges or over the counter markets. The Fund will invest in companies who make advantageous use not only of their capital but also of their intangible assets (for example, but not limited to, brand values, technical development or strong customer base). The Fund may also invest, on an ancillary basis, in debt securities convertible into common shares and other equity linked instruments. For the full objectives and investment policy please consult the current prospectus. **On 9 August 2024, a Luxembourg domiciled SICAV named Invesco Responsible Japanese Equity Value Discovery Fund was merged into the Invesco Japanese Equity Advantage Fund, a sub-fund within the same fund umbrella.**

### Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

### Fund Strategy

The fund manager uses a bottom up research process to focus on high quality companies with sustainable competitive advantages, particularly those with strong intangible values which generate healthy cash flows. Specifically, the team believes that companies with, including but not limited to, strong brands, technology and customer loyalty can offer compelling long-term investment returns when purchased at attractive prices. These values embedded within a robust business franchise are difficult to create or replicate, and allow companies to sustain a competitive advantage. The effective use of intangibles can generate strong free cash flow and increase enterprise value.

Past performance does not predict future returns. Data points are as at month end.
