Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund.

Fund Strategy

We seek to invest in companies whose share prices are substantially below our estimate of fair value. Our search for undervaluation leads us to look for new ideas in unloved areas of the market. At the same time we have a clear preference for cash-generative companies with strong balance sheets, as these attributes suggest sustainable business models and conservative management.
